Regex Crossword Solver: how it is put together

A regex crossword solver written in Python. It parses each row and column regex with a PLY grammar (see grammar.md), turns the puzzle into an SMT problem, and solves it with Z3. B.

sketched from the files

Regex Crossword Solver: the run, step by step

If a step fails, the honest run says so and stops.

traced, not guessed. GK

Product map: what Regex Crossword Solver is for

WHAT IT IS

A regex crossword solver written in Python. It parses each row and column regex with a PLY grammar (see grammar.md), turns the puzzle into an SMT problem, and solves it with Z3. B.

WHAT GOES IN

The files at the top of the tree: regex_parser.py, test_parser.py, regex_solver.py.

WHAT COMES OUT

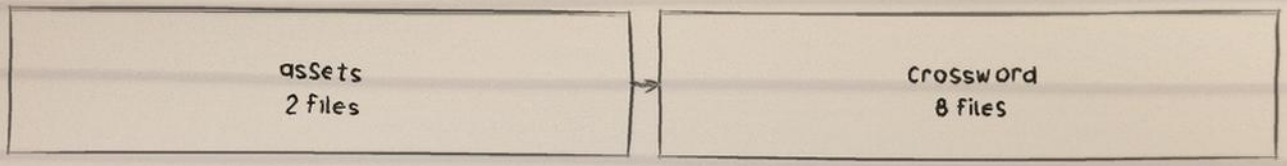

What the top files produce when they run or get read. Nothing else is promised.

WHERE IT STOPS

No service behind it, no account, no upload. If a path is untested, VISUAL.md says so.

mapped by hand, 

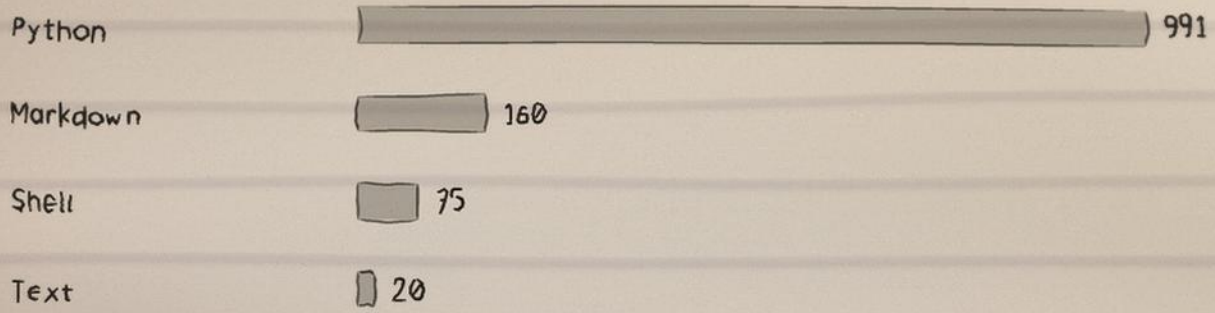

Regex Crossword Solver: the parts and their jobs

Each part is a folder or a file that is really in the tree.
If a part is only a name in the README, it is not drawn here.

Regex Crossword Solver in numbers, counted 2026-10-30

Counted from the local snapshot of this repo. Method for every number: VISUAL.md.

18 files in the tree.
51 commits, first 2023-01-29, last 2026-10-30, from the local git log.
3 test files by name.

counted and drawn, GK

Regex Crossword Solver: schematic of the apparatus

the system as a machine: parts, flow, and measurements

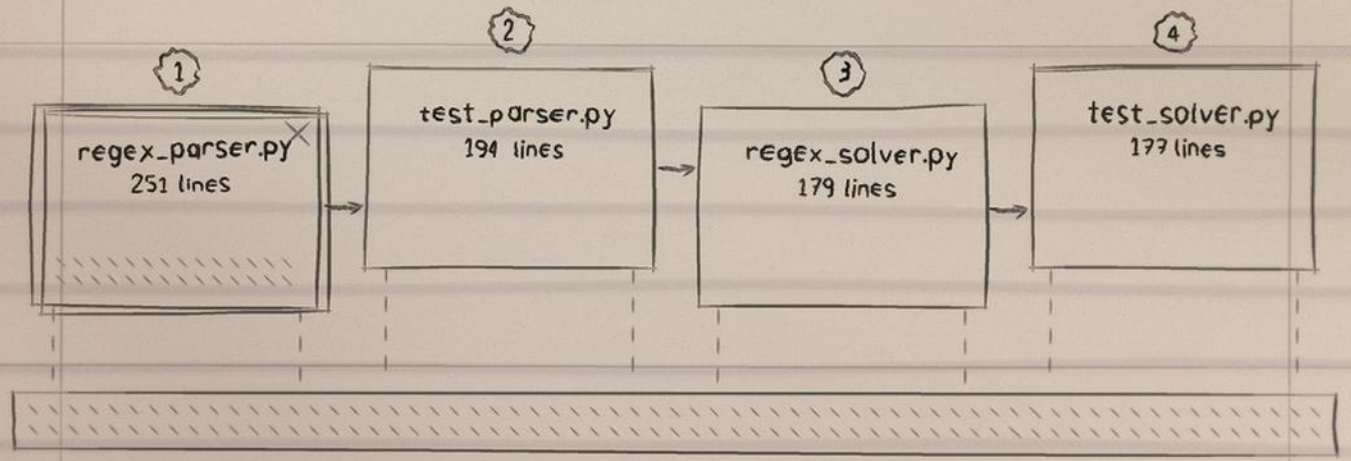

construction lines left in, as drawn

parts list

1. regex_parser.py
2. test_parser.py
3. regex_solver.py
4. test_solver.py

in flow order, first to last

housed in: assets, crossword

base plate: the repo itself, sectioned

span: 18 files, 1246 lines counted

measured in the code: loop cap 10 (regex_parser.py)

turns of the crank so far: 51 commits, 2023-01-29 to 2026-10-30

measured and sketched, GK
